EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nicholas Peters on January 28, 2010.

The application has been amended as follows: please amend the last three (3) lines of claim 16 as follows.

Claim 16: "conduction path without being substantially adjusted by any other intervening electrical device along the operator conduction path when mains voltage to the mains voltage input fails."

2. Claims 15-22, 24-30 and 32-40 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 15, the prior art does not teach or suggest a battery backup apparatus connected with a movable barrier operator, comprising, inter alia, the battery is charge through an impedance element in parallel with the second unidirectional isolation device and the plug, and the battery backup voltage is provided through the second unidirectional isolation device, the plug, and the unidirectional isolation device when the mains voltage to the movable barrier operator fails. Claims 25-30 and 32 depend from claim 15.

Regarding claim 16, the prior art does not teach or suggest a battery backup apparatus in combination with a movable barrier operator, where the movable barrier operator comprises an operator unidirectional isolation device in parallel with an impedance element, and where the battery backup apparatus comprises a battery unidirectional isolation device between the battery and the battery conducting path, wherein the battery provides DC voltage to the movable barrier operator via the battery unidirectional isolation device, the plug, and the operator unidirectional isolation device. Claims 17-22 and 24 depend from claim 16.

Regarding claim 33, the prior art does not teach or suggest a battery backup apparatus in combination with a movable barrier operator, where the movable barrier operator comprises an operator unidirectional isolation device in parallel with an impedance element, and where the battery backup apparatus comprises a battery unidirectional isolation device between the battery and the battery conducting path, wherein the battery provides DC voltage to the movable barrier operator via the battery unidirectional isolation device, the plug, and the operator unidirectional isolation device. Claims 34-40 depend from claim 33.

It appears that the most relevant prior art reference is US 7,391,184 (Luo), which discloses a conduction path between the DC bus of a power consuming device (fig 2, 4; 110, 230 and 310,330) and an attachable backup battery (120, 320), where the battery discharges via diodes (429, the anti-parallel diode of Q2) that bypass the battery charger (fig 4, item 414, 420) and an impedance element (fig 2, item Q2). Luo, however, was not known the art before applicants' filing date.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ADI AMRANY whose telephone number is (571)272-0415. The examiner can normally be reached on Mon-Thurs, from 10am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jared Fureman can be reached on (571) 272-2800 x36. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2836

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
